WebDeployClient Utility

WebDeployClient utility (also called as **Vendor Licensing utility**) is a Web application, allowing you to manage your AccuSoft ImageGear deployment license access keys. Using this utility you can:

- browse your [Solutions](#)
- browse [Licensing Pools](#) within each solution
- generate new deployment access keys within each licensing pool (see [Creating new access keys](#))
- download existing access keys (see [Downloading existing access keys](#))

WebDeployClient connects to the AccuSoft licensing database. You should use this utility, if you are using an AccuSoft's product and need in deployment license access keys to deploy your product.

It can also be used to lookup your deployment information such as solution name, solution key, etc.

How to Run WebDeployClient Utility

To run **WebDeployClient** utility please type URL:

<https://licensing.accusoft.com/v1/WebDeployClient/Login.aspx>

in the address combo box of Internet Explorer and press **Enter**.

How to Use WebDeployClient Utility

This is the Login screen for the **WebDeployClient** utility:

ImageGear Licensing
Leading the industry in customer support
Companies rely on AccuSoft for quality support and follow-through.

Welcome to AccuSoft's deployment licensing page. Please login below.

Username:

Password:

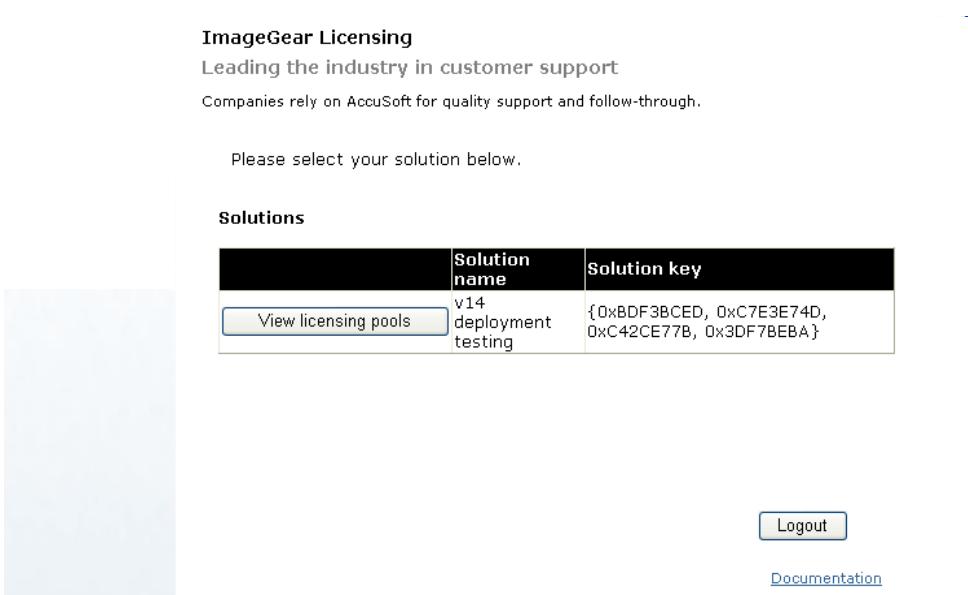

[Documentation](#)

Please do the following:

1. Enter your deployment **Username** and **Password** in the appropriate textboxes.
2. Press the **Login** button.

Solutions

If the **Username** and **Password** you have entered in the **Login** screen are correct, the utility will display a list of your solutions in the screen that is shown below:

ImageGear Licensing
Leading the industry in customer support
Companies rely on AccuSoft for quality support and follow-through.

Please select your solution below.

Solutions

	Solution name	Solution key
<input type="button" value="View licensing pools"/>	v14 deployment testing	{0xBDF3BCED, 0xC7E3E74D, 0xC42CE77B, 0x3DF7BEBA}

[Documentation](#)

To see the list of licensing pools within a solution:

1. Click on the **View licensing pools** button.
2. The list is displayed below the Solutions table (*see the screen below*).

ImageGear Licensing

Leading the industry in customer support

Number of new keys: Max: 0

[Documentation](#)

Creating new access keys

The **Max licenses** column of the **Licensing Pools** table displays the maximum number of the access keys you can obtain for the given pool.

The **Used licenses** column of the **Licensing Pools** table displays the number of the access keys already obtained for the given pool.

If the number of the already obtained access keys displayed in the **Used licenses** column is less than the number displayed in the **Max licenses** column, you can create new access keys by pressing the **Create new access keys** button.

You can also specify in the **Number of new keys** field how many keys you would like to create. The maximum number you can specify is displayed to the right of the field. If the **Download new keys** checkbox is checked, the utility will prompt you to download the newly created keys once they are created.

Downloading existing access keys

If the number shown in the **Used licenses** column of the **Licensing Pools** table is greater than 0, you can download all the keys by pressing the **Download all access keys** button
