WebDeployUser Utility

The **WebDeployUser** utility (also referred to as the **End User Licensing utility**) is a Web-based application, allowing you to generate an AccuSoft ImageGear deployment license for a given hardware key. The WebDeployUser utility connects to the AccuSoft licensing database.

How to Run WebDeployUser Utility

To run the **WebDeployUser** utility enter the following URL:

<https://licensing.accusoft.com/v1/WebDeployUser/WebDeployUser.aspx>

in Internet Explorer and press **Enter**.

How to Use WebDeployUser Utility

This is the **Entry** screen for the **WebDeployUser** utility:

ImageGear Licensing

Leading the industry in customer support

Companies rely on AccuSoft for quality support and follow-through.

Please enter the hardware key and click the button to generate the license.

Hardware Key:

Access Key:

Download license

[Documentation](#)

Please do the following:

1. Enter a hardware key in the **Hardware Key** text box and press the **Download license** button.
2. If the utility succeeds when processing the hardware key, it will display the access key of the newly created license in the **Access Key** text box, and prompt you to download a file containing the license key.
3. Download the license key file to your machine.
